universal life insurance
policy with both fixed
and indexed interest
crediting options.

Signature Indexed Universal Life is issued by

Why Permanent Life Insurance?

- Because you do not want your family worrying about money in the weeks and months after you are gone.
- Because you want your family to continue their lifestyle without interruption.
- Because you want your surviving spouse to have income for retirement.
- Because, if you go early, you want to provide care for any surviving parent.
- Because you want to provide for your children.
- Because you want to preserve your business after you are gone.
- Because you want help fund your children or grandchildren's education.
- Because you love them.

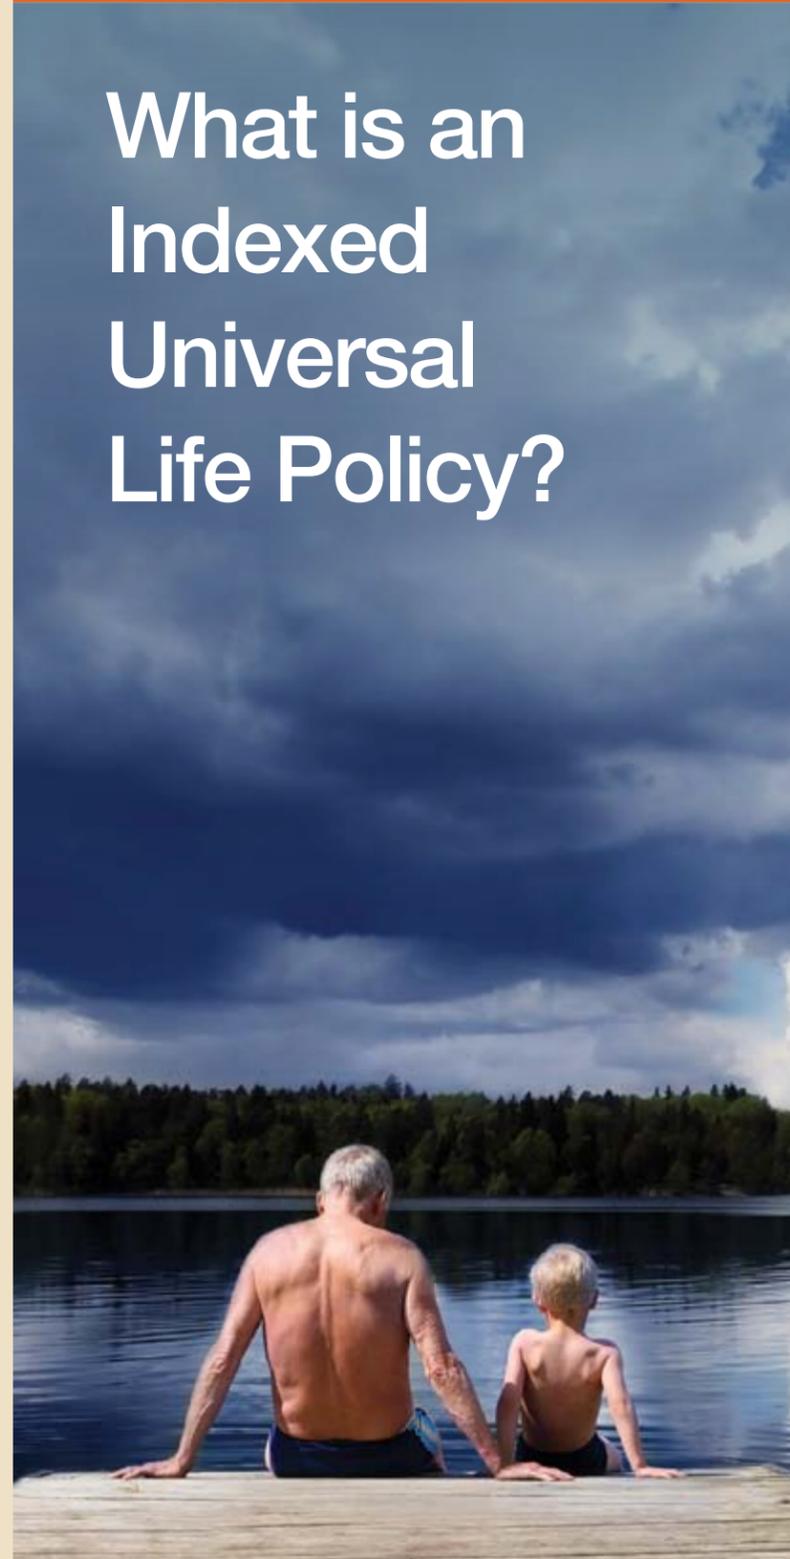

What is an Indexed Universal Life Policy?

An Indexed Universal Life Policy (IUL) is a type of permanent life insurance policy that provides a death benefit as well as the ability to build Accumulation Value. This type of policy has the potential to earn interest based upon the performance of an index. However, you are never invested directly in the market and your policy will never be credited a negative interest rate because there is a 0% floor built into the policy. This allows you to take advantage of the potential increases in the market while maintaining a level of protection in the event that the index drops below 0%.¹ With an IUL policy, you have the flexibility to adjust the amount of premiums you contribute. You may even have the potential to stop contributing premiums if you accumulate enough to cover the cost to keep the policy active. If your Accumulation Value is enough, you may be able to access some of your accumulation later in life through policy loans.²

Why are People Turning to Indexed Universal Life?

In a fluctuating economic environment, individuals have been looking to place their premium dollars where they can obtain protection for their family and provide a safety net for their future. One of the appealing features of the Signature Indexed Universal Life is the fact that your premium dollars are not directly placed in the market, so you do not participate in the potential decreases during negative economic years.¹

¹. You will never be credited a negative interest rate related to a change in the market, however, due to monthly deductions to your policy, your Accumulation Value may decrease. ². Policy Loans are subject to interest charges and can reduce the death benefit paid to beneficiaries. Outstanding policy loans may affect the policy's death benefit, the value of the policy and possibly the length of time the policy remains in force.

Policy Features

Premium Payments

With Signature Indexed Universal Life, you are able to choose the amount and frequency of your premiums. As Accumulation Value builds, you may be able to skip a premium payment since the cost of insurance for every period is debited from your accumulation value.

Cumulative Interest Rate Guarantee

Signature Indexed Universal Life provides a Cumulative Interest Rate Guarantee of 2.5% at full surrender or the insured's death. At full surrender or the insured's death, the accumulation value will not be less than if all net premiums had been allocated to the Fixed Account with 2.5% interest credited throughout the life of the contract.

Surrender Charges

If you choose to cancel your policy in the first ten years, surrender charges may apply.

The Flexibility to Do More While Living

Besides the importance of the death benefit to your family, Signature Indexed Universal Life Insurance from American National Insurance Company also has the potential to provide considerable benefits, through policy loans³, that can be used during your lifetime.

Flexibility Features

After your policy accumulates value, you are able to take a policy loan¹ from the built up Accumulation Value and choose between a fixed or a variable interest rate on the policy loan amount. You also have the ability to switch between variable and fixed rates up to once per year up to five times for the life of the policy. Outstanding policy loans may impact the value of the death benefit, the value of the policy and possibly of the length of time the policy is in force. You will receive an annual statement that will reflect the Accumulation Value of your policy and the current death benefit amount.

Interest Crediting Methods

You will be able to choose how your policy accumulates earned interest and therefore Accumulation Value. You have the option to use any combination of the four options below; you can allocate your premium to one of the Indexed Interest Crediting Strategies for the opportunity for higher potential interest earnings or increase your participation in the Fixed Account.

Indexed Interest Crediting Strategies

With an indexed interest crediting strategy, an index is simply used as a way to measure the interest that can be credited to your strategy. Since you are never directly in the market, you may not realize all of the increase as you will not participate in any dividends but only in the movement of the index itself.

Point-to-Point with Cap

- This strategy compares the value of the S&P 500® Index at the beginning of the one year Segment Term to the value at the end of the one year period and measures the percentage of increase or decrease.
- The Participation Rate for this strategy is 100%.
- If there is an increase in the value of the index, this strategy will be credited the percentage of increase of the index, up to the Cap set at the beginning of the Segment Term.
- If there is a decrease in the value of the index, this strategy will be protected by the 0% floor and will receive no interest earnings.

Policy Form Series ULPTP14

Point-to-Point with Cap

Hypothetical Example One⁴

If the index value increased 16% but there is a 14% cap, the strategy will be credited **14%**.

Point-to-Point with Cap and Higher Floor

- This strategy compares the value of the S&P 500® Index at the beginning of the one year Segment Term to the value at the end of the one year period and measures the percentage of increase or decrease.
- At the end of the year, if there is a decrease in the value of the index, this strategy will be credited the interest earnings from the declared floor for that segment.
- The Participation Rate for this strategy is 100%.
- If there is an increase in the value of the index, this strategy will be credited the percentage of increase of the index, up to the Cap set at the beginning of the Segment Term.

Policy Form Series ULPTP14

Point-to-Point with Cap and Higher Floor

Hypothetical Example⁴

If the index value decreased -4% but there is 1.5% floor, the strategy will be credited **1.5%**.

Hypothetical Example Two⁴

If the index value decreased -4% but there is 0% floor, the strategy will be credited **0%**.

Point-to-Point with Specified Rate

This strategy also compares the value of the S&P 500® Index at the beginning of the one year segment term to the value at the end of the one year segment term.

- An interest rate is set at the beginning of the segment term.
- If the value of the index increases or remains the same, the strategy will be credited the specified interest rate.
- If the value of the index decreases, the strategy will receive no interest earnings.

Policy Form Series ULSR14

Point-to-Point with Specified Rate

Hypothetical Example⁴

	Starting Index Value	Ending Index Value	Change in Index	Interest Credited
1	1000	1100	Increase	7.0%
2	1200	1200	No Change	7.0%
3	1300	1170	Decrease	0%

Specified Rate is **7.0%**.

Fixed Account

The fixed account will earn interest at a rate periodically determined by the company. Interest is calculated using a compound method assuming a 365 day year. Interest is credited at an annual effective interest rate. Any surrenders will reduce the amount of interest credited to your policy. There is no minimum allocation associated with the Fixed Account. The Sweep Account Transfer may allocate any percentage you choose to the Fixed Account. However, the combined total percentages allocated to the Fixed Account and Indexed Strategies cannot exceed 100%.

³ Policy Loans are subject to interest charges and can reduce the death benefit paid to beneficiaries. Outstanding policy loans may affect the policy's death benefit, the value of the policy and possibly the length of time the policy remains in force. ⁴ The use of alternative assumptions in these examples could produce significantly different results. These hypothetical examples are intended solely for illustrative purposes and are not an indication of past or future performance of the Signature IUL product. The published S&P 500® Index does not reflect dividends paid on the stocks underlying the Index.

Customize Your Coverage

What other needs do you hope to fulfill? In order to custom design your coverage under the Signature Indexed Universal Life Policy, we offer a variety of optional Riders⁵ for this policy.

ANICO Signature TermTM Rider

This rider allows you to purchase an amount of additional term insurance (10, 15 or 20) on yourself, a family member or an associate so long as the policy owner has an insurable interest.

Policy Form Series ULLTR13

Disability Waiver of Minimum Premium Rider

If the person insured by the policy should become totally disabled, this rider ensures no further premiums will be required as long as the disability continues. The insured person must provide proof of total disability, which must last for at least six consecutive months. The rider waives the greater of the minimum premium or the monthly deductions.

Policy Form Series ULDW91

Disability Waiver of Stipulated Premium Rider

A similar rider waives a certain amount of the premium, as stipulated on the data page that accompanies the policy. These waived premiums are considered to be paid premiums and are credited to the insurance policy. This amount may not keep the policy active to policy maturity date. Again, the insured must provide proof of total disability that has continued for at least six consecutive months.

Policy Form Series PWSTP

Children's Term Rider

Separate level term life insurance may be provided for each child age 15 days old through 18 years at policy issue. Each insured child may be covered up to the earlier of:

- The child's attained age of 25, or
- The policy anniversary following the insured's attained age of 65

Policy Form Series ULCTR14

⁵ Not all Riders are available in all states, and there is an additional cost for the Riders except where noted. ⁶ Accelerated Benefit Riders are subject to an administrative fee of up to \$500 and an actuarial discount that will be assessed when the benefit is elected.

Guaranteed Increase Option Rider

This option allows the policy owner to purchase additional insurance covering the life of the insured person on future specified Option Dates. No proof of insurability is required if the coverage is purchased on one of these dates.

Policy Form Series ULGIO14

Overloan Protection Benefit Rider

The Overloan Protection Rider can keep a policy with a large amount of debt from lapsing, within certain limitations.

- This rider is automatically included for the Guideline Premium Test but is not available if the Cash Value Accumulation test is chosen

Policy Form Series ULOPR14 Forms may vary by state.

Accelerated Benefit Riders⁶

Should you become terminally, chronically, or critically ill, an accelerated discounted death benefit may be available to you before you die, providing funds for you to use for medical or other unexpected expenses. There is no additional premium for this benefit.

Policy Form Series ABR14-TM, ABR14-CH, ABR14-CT

For more detailed information, consult your Agent to refer to the Accelerated Benefit Rider Brochure, Form 10422-A.

What's Next? How do you determine if Signature Indexed Universal Life Insurance can help meet future financial needs? There are many details to consider. Perhaps the best place to start is to meet with your agent to discuss your specific situation and needs. Your agent may provide an illustration demonstrating the death benefit and accumulation features of the Signature Indexed Universal Life Insurance policy. Together you can decide the best plan of action to help protect today's dreams and tomorrow's future.

Important Considerations

The following information should be considered when making your decision to apply for an Signature Indexed Universal Life Insurance Policy and any optional Riders or Benefits:

The information contained in this brochure is neither a policy of insurance, nor an offer to issue a policy, but it is a general description of the benefits available under a policy providing the benefits outlined. This policy does have limitations.

Expenses, cost of insurance, and interest credited are all explained in your policy. In addition, you will receive a detailed annual report showing all the transactions which occurred in your policy during the year, including the beginning Accumulation Value, premiums paid, expense charges, cost of insurance deducted, interest credited, any loans taken during the policy year, and the ending balance.

The Signature Indexed Universal Life Insurance policy is not a registered security or stock market investment and does not directly participate in any stock or equity investments or index. When you buy this policy, you are not buying an ownership interest in any stock or index.

American National Insurance Company and its agents do not make any recommendations regarding the selection of indexed strategies. American National Insurance Company and its agents do not guarantee the performance of any indexed strategies.
